

PROVIDER ALERT

ICD-10 COMING OCTOBER 1, 2014

FEBRUARY 4, 2014

The National Council for Behavioral Health recently held a webinar giving an overview of ICD-10 for behavioral health providers. A number of providers were not able to attend the webinar due to overwhelming response.

ICD-10 will be going into effect as of 10-1-14 and all providers will need to be using this new coding system on and after that date for billing purposes. The Mental Hygiene Administration (MHA) is working on developing the covered services for the PMHS at this time. ValueOptions is also working to be able to accept these new codes as of October 1, 2014.

MHA thought that this webinar would be a good overview for behavioral health providers to view as well as share with their staffs. Please feel free to check this out:
