

# **PROVIDER ALERT**

## Authorization End-Dating and Discharge: Clarification to Instructions

### January 26, 2023

#### Target Audience: All Behavioral Health Providers

In line with prior communications regarding a change in the authorization end-dating/discharge process, this alert is to notify providers that the final implementation is ready for release.

<u>Effective February 1, 2023</u>, providers must use the end-dating/discharge functionality in the Incedo Provider Portal (IPP).

- The current Outpatient Discharge/End-Dating Form will be removed as of the same date and the Optum Maryland call center will no longer fulfill end-dating authorizations on behalf of providers for any levels of care.
- The Clinical Discharge Form is still required for higher levels of care. It must be completed at the same time as the Update End-Date process.
- Please verify that claims have not been made after the desired end date/discharge date that is being requested.
- Refer to this provider alert dated January 11, 2023, for additional detail.
- Please note, Optum Maryland's Authorization/Service Request training now includes this functionality. Please view the monthly Provider Training Calendar for details of upcoming trainings.

To support providers in this transition, Optum Maryland's Authorization/Service Request training webinars now include information on how to process end-dates/discharge in the IPP. The monthly Provider Training Calendar can be accessed using <u>this link</u>. Providers can also view the <u>Incedo Provider Portal Authorization End-Dating and Discharges</u> training video on maryland.optum.com.

#### To help providers navigate the authorization end-dating/discharge functionality, Optum Maryland would like to provide some clarification on the previously communicated instructions:

1: Select the participant you need to discharge/end-date and then click;

- 1. "Authorization"
- 2. "Requests"

5. Click to expand the "Filter By" field

- 6. Enter the copied SRID into the SRID field, as shown below.
- 7. Click the filter icon

- 8. The "Update End Date" button is now active, as shown below.
- 9. All authorization lines are checked.
  - Please note; in order for the "Update End Date" button to become active, ALL of the authorizations must be seen. If the screen is defaulted to 10 records (for example), the button will not become active.
